

**THIS IS A WORLD
PAYMENT SOLUTION**

SEMI-STABLE TEETER

ABSTRACT

Base Price 1€

Semi-Stable Teeter (SST) combines the advantages of Stable and traditional token, allowing a base price for investors. As so, investors can mitigate their market risk and gain return on their investment.

SST will also allow you to instantly convert cryptocurrencies to fiat for purchases, ATM withdrawals, and bank transactions through its WorldSPay payment system. The payment system fully protects users from any limitations and risks, which are the shortcomings of traditional financial systems.

SEMI-STABLE TEETER

INTRODUCTION

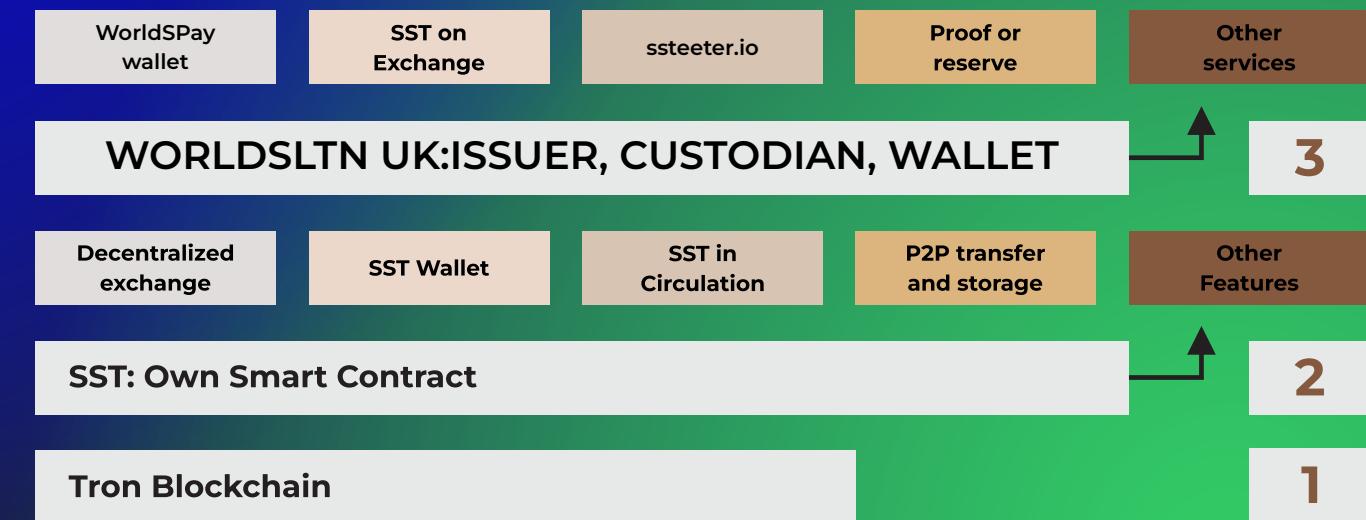

SST issue, redeem and base-price pegging shall be conducted and maintained through our WorldSPay payment system and www.ssteeter.io website. The SST base-price shall be always equal to 1 EURO. The WorldSPay is a comprehensive and complex full-banking system with a mobile application and payment card that holds a special license for a combination of traditional banks, crypto exchanges and international payment card systems. The ratio of SST and its base-price on this system and the web wallet shall always be 1:1 and corresponding fiat fund shall be deposited in our bank account and publically reported. This shall allow users to withdraw fiat money and make purchase by converting each SST they own through the payment system and web wallet at base-price of 1 EURO. The base-price shall be maintained only at the WorldSPay payment system and www.ssteeter.io.

The total token supply is limited by total fiat reserves in our bank account, and the users can trade their SSTs purchased at base-price from the WorldSPay and our web-platform on the crypto exchanges at the market price.

SEMI-STABLE TEETER

TECHNOLOGY STACK

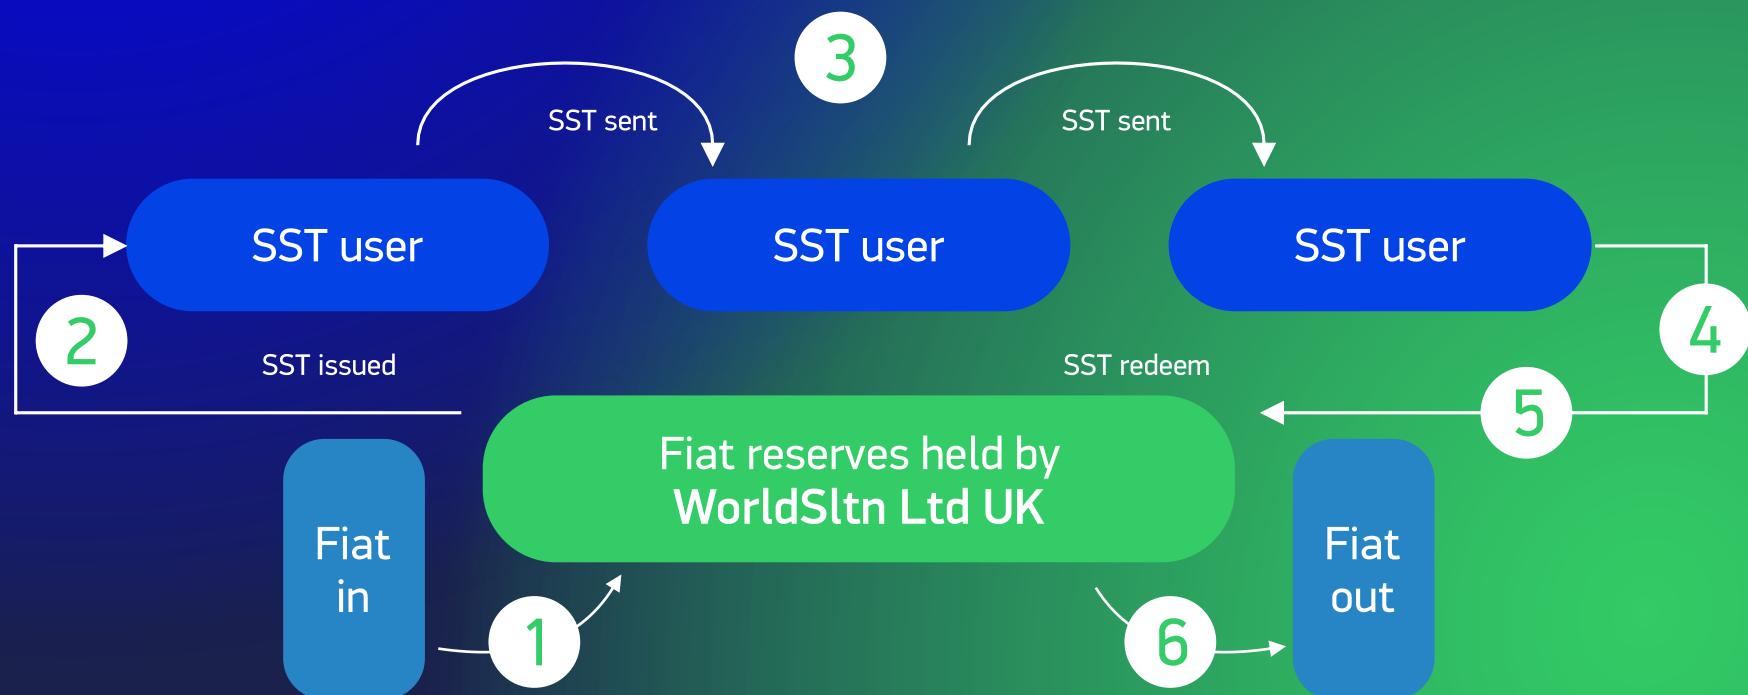

Description of each layer:

1. The first layer is the Tron blockchain and SST transactional ledger is included in the Tron blockchain.
2. The second layer is SST own smart contract which has mint/burn, track, transact, and store functions
3. The third layer is WorldSltn.Ltd which is primarily responsible for fiat deposit/withdrawal, custody of fiat reserve, audit reports.

SEMI-STABLE TEEETER

FLOW OF FUND PROCESS

Steps:

1. Users deposit fiat currency into WorldSltn.Ltd bank account.
2. WorldSltn.Ltd generates and credits the user's SST account. SST enters into circulation.
3. Users can transfer, exchange, and store SSTs via www.ssteeter.io webwallet.
4. Users deposit SSTs in www.ssteeter.io web-wallet for redemption into fiat currency.
5. Users also can use their WorldSPay visa and master card which is accepted in 168 countries worldwide in order to withdrawal fiat and make purchase instantly.
6. WorldSltn.Ltd destroys the SSTs and transfers corresponding fiat currency to user's bank account.

SEMI-STABLE TEETER

PROOF OF RESERVE PROCESS

Each SSTEeter in circulation represents one EURO held in our reserves which means the system is fully reserved when the sum of all SSTEeters in existence (at any point in time) is equal to the balance of EURO (calculated multiplying all SSTEeters by base price) held in our reserve. The corresponding total amount of EURO held in our reserves is proved by publishing the bank balance and undergoing periodic audits by professionals. Find this implementation further detailed in next slide:

SEMI-STABLE TEETER

TRANSPARENCY

TSST = Total
Property Token

TSST is the total number of SSTs in circulation at any given time (total property token).

TEURO = Daily Bank Account Balance

TEURO is the balance of EURO account at any given time.

TSST <= TEURO
All SSTethers are fully reserved

Each SST shall be backed by fiat deposit. The solvency ratio shall be maintained by the equation.

SEMI-STABLE TEETER

USDT vs SSTeeter

Capabilities	USDT	SST
Own platform Mint / Burn protocol Fiat deposit/withdrawal Transparency (auditing)	www.tether.to Yes Yes Yes	www.ssteeter.io Yes Yes Yes

We are also bringing to our community a revolutionary initiative that lets you track the crypto markets and safeguard your investments at the same time:

WorldSPay combines the best features currently found on payments platforms and exchanges.

WorldSPay will be a revolutionary new service that gives you secure access to the latest market information, keeps your assets safe, and helps protect you from market volatility.

More details will be announced soon!

DESCRIPTION

CORE BANKING

The ultimate solution for financial institution to modernize and streamline their banking operation

BANK IBAN

Individual IBAN for Private&Business

RESELLER

Manage your reseller network

SQ-PAY

Generate QR to receive and send payment

CRYPTO CURRENCY EXCHANGE

500+ Cryptocurrencies with liquidity available, Possibility to buy, sell in Euro and convert to other pairs

DESCRIPTION

DEPOSIT MANAGEMENT

Manage your deposits, euro, usd and crypto

CASHBACK

1% CashBack from crypto debit card purchase

MERCHANT POS TERMINAL

Enable merchants to process payments to complete a customer purchase.

AUTOTRADING

Artificial Intelligence based trading Software guarantees profit

VIRTUAL AND VIRTUAL GIFT CARD

Virtual card (with KYC), Virtual Gift Card (without KYC) are accepted on any POS Terminal worldwide

PAYMENT SYSTEM

- Crypto to Fiat, Fiat to crypto instant conversion
- Bitcoin and Altcoin wallet
- International transaction
- Prepaid and Debit card
- Digital bank and crypto exchange

CRYPTO TRADING

WorldSPay system is a sophisticated system with the fastest possible trading, complete data and a reliable AI-controlled wallet service

MERCHANT POS TERMINAL

Never so easy to receive payments
anywhere in the WORLD

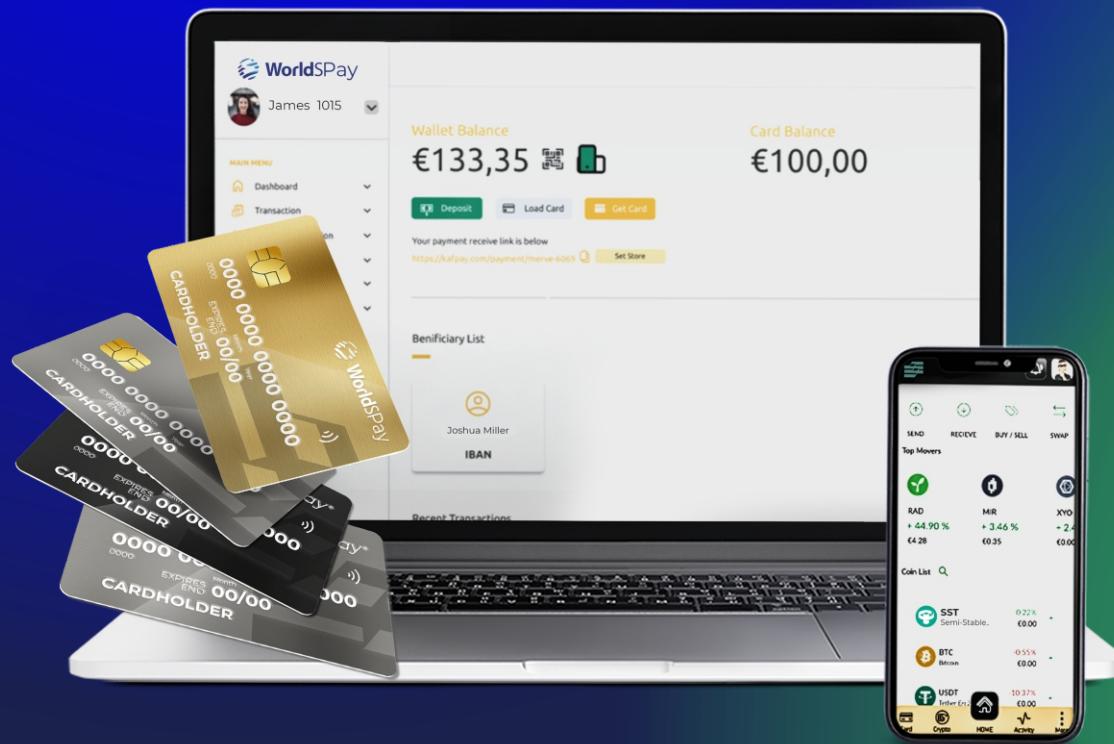

Virtual card (with KYC)
Virtual gift card (without KYC)

Virtual and virtual gift cards are accepted on any POS Terminal worldwide

1% CashBack from
crypto debit card
purchase

More than a Core Banking solution
